#### **Farm Definition**

Number of Farms and Land in Farms: Final Estimates by State and United States, 2008-2012, U.S. Department of Agriculture, Agricultural Statistics Board, National Agricultural Statistics Service (NASS), Statistical Bulletin No. 1030.

**Introduction:** Number of farms and land in farms estimates are published annually. These data were collected by the National Agricultural Statistics Service during the June Agricultural Survey. In addition, the responsibility for the Census of Agriculture was transferred to NASS from the Census Bureau starting with the 1997 Agriculture Census.

The farm definition for the Census of Agriculture and the Department of Agriculture's (USDA) National Agricultural Statistics Service (NASS) are now the same. That is, a farm is any establishment from which \$1,000 or more of agricultural products were sold or would normally be sold during the year.

The following changes were made to ensure comparability between the Census of Agriculture data and the annually published NASS estimates. Beginning in 1995 NASS survey interviewers counted operations having five or more horses or ponies and no other agricultural sales as farms. An operation with one or more horses with agricultural sales of at least \$1,000 already qualified as a farm on both NASS survey and the Census. Beginning in 1997, the NASS Fall Agricultural Survey was added to estimate all operations qualifying as a farm during the year, the census reference period. Beginning with the 1997 Census of Agriculture, Christmas tree farms and farms that were wholly enrolled in the Conservation Reserve Program were included in the census farm count. Two new industries, Maple Syrup and Short Rotation Woody Crop farms, were added to both counts beginning in 1997.

Land in farms is all land operated by farms during the year. It includes crop and livestock acreage, wasteland, woodland, pasture, land in summer fallow, idle cropland, and land enrolled in the Conservation Reserve Program and other set aside or commodity acreage programs. It excludes public, industrial, and grazing association land and nonagricultural land. It excludes all land operated by establishments not qualifying as farms.

**Economic sales classes** are based on the gross value of sales, which include sales of agricultural products such as crops, livestock, horses, honey, furs, fish, nursery and greenhouse products, rabbits, etc. Government program payments from the previous year are also included.

**Procedures:** Revisions were made after a thorough review of the original survey data and the 2012 Census of Agriculture. The 2008-20012 estimates shown here are considered final and will not be revised again.

#### **Farm Definition History**

The definition of a farm has remained the same since 1974. Activities included as agriculture, however, have undergone modification in recent years. Beginning in 1995, operations having 5 or more horses or ponies and no other agricultural sales were counted as horse farms. An operation with 1 or more horses with agricultural sales of at least \$1,000, qualified as a farm. Two industries, maple syrup and short rotation woody crop farms, were added beginning in 1997 as a result of the new North American Industry Classification System (NAICS). These changes were made to achieve comparability with the Census of Agriculture farm definition. All the changes in the farm definition beginning in 1995 were carried back to 1993 and included in the 1993-1998 estimates. These changes bring comparability between the Census of Agriculture data and the annually published NASS estimates. Because of these changes in the farm definition, the official estimates show a level difference in the number of farms between 1992 and 1993 in some states. To further align the counting of farms with the Census of Agriculture, places with 100 acres or more of pasture only in 2002 were included in farm and land in farm numbers. The handling of Indian reservation land was changed in 2002 to provide some accounting for individual farms.

#### Minimum Criteria for "FARM" Definition, 1840 – Present and Enumeration of Apiaries and Fur Farms

Year	Acres in Place	Value of Agricultural Products (Produced)	Value of Sales of Agricultural Products	Required some Agricultural Operations	Apiaries and Fur Farms Enumerated
1974 - Present			\$1,000 or more		
1959	Less than 10 10 or more		\$250 or more \$50 or more		
1954	Less than 3 3 or more	 \$150 or more	\$150 or more 		
1950	Less than 3 3 or more	 \$150 or more	\$150 or more 		Apiaries Fur Farms
1935 - 1945	Less than 3 3 or more	\$250 or more 	 	 X	Apiaries Fur Farms
1930	Less than 3 3 or more	\$250 or more		X	Apiaries
1925	Less than 3 3 or more	\$250 or more	 	 X	
1910 - 1925	Less than 3 3 or more	\$250 or more		 X	Apiaries
1900	Less than 3 3 or more			X	Apiaries
1870 - 1890	Less than 3 3 or more		\$500 or more	 X	Apiaries
1860					
1850		\$100 or more			Apiaries
1840					

**Historic Estimates:** Final estimates of Farms and Land in Farms in earlier years are available in Statistical Bulletins, No.1030 for 2008-2012, No. 1018 for 2003-2007, No. 991 for 1998-2002, No. 955 for 1993-97, No. 895 for 1988-92, No. 792 for 1979-87, SpSy3 for 1975-80, No. 594 for 1969-75, No. 507 for 1959-70, No. 316 for number of farm estimates for 1910-59 and land in farms estimates for 1950-59.

#### Special Note Regarding the 2007 Estimates

Census: The Farms and Land in Farms publication is produced annually. It also provides revisions, as necessary, to previous year estimates. The Census of Agriculture, conducted every five years provides a base from which the annual surveys measure the change from that base. At the end of the next five year cycle, the annual estimates are revised based on inter-census trends.

The 2007 Census of Agriculture showed a significant increase in the number of farms, and reversed the downward trend that was shown in the annual estimates of Farm Numbers since the 2002 Census of Agriculture. NASS believed that some of the increase was due to methodological changes that allowed NASS to more accurately count small farms in the 2007 Census. This is discussed in more detail below.

Methodological Discussion: Each year NASS conducts the June Area Frame Survey (AFS) to provide an estimate of the number of farms and the land in farms. The exception is Alaska, which does not have an area frame and uses a list survey instead. The area frame is stratified by land use. A sample of approximately 11,000 segments of land (each approximately one square mile in size) is selected, and field enumerators visit each sampled segment to identify agricultural activity within the segment. The AFS is assumed to provide complete coverage of the universe of farm and ranch operations, because the area-based frame covers all land in the U.S.

In preparation for the census of agriculture, NASS builds the Census Mail List (CML) consisting of all known farms and potential farms. In addition, NASS uses the area frame sample to measure and account for the incompleteness of the CML in a dual-frame estimation procedure. This procedure assumes complete coverage of the universe of farm and ranch operations because the undercoverage of the CML is accounted for through the area frame sample.

Results from the 2002 Census of Agriculture indicated undercoverage of farms in the lowest value of sales categories. This category includes a high concentration of disadvantaged and minority farm operators. In preparation for the 2007 Census, NASS exerted more extensive efforts than in previous censuses to build a comprehensive list. Additionally, NASS worked with several community based organizations and producer groups to enhance awareness, to increase response, and to improve coverage of these types of farms. This resulted in a 2007 CML with 3,194,373 records as compared with 2,841,788 in 2002. Additionally, NASS augmented the area frame sample with segments that were located in areas where small and minority operated farms were likely to be located.

The 2007 Census of Agriculture produced a greater number of farms in the lowest value of sales categories. The extensive list building efforts and the augmentation of the area frame sample allowed NASS to capture more of the small farms with less than \$10,000 in value of agricultural sales. Additionally, 2007 was a year of relatively high commodity prices. As the value of farm commodities increased, more very small operations were able to meet the \$1,000 value of sales threshold to qualify as a farm in the census.

After the 2007 Census of Agriculture, NASS conducted a classification-error research for the census in five states. The study used data from the 2007 AFS and the 2007 census to examine whether there were farms incorrectly classified as nonfarms, and whether there were any nonfarms incorrectly classified as farms. Records in the 2007 AFS were matched to the 2007 census using probabilistic record linkage. Records whose farm status differed in the two data collections were interviewed to determine which data was correct.

Results of the study showed that where there were discrepancies in farm status, the census data was more often correct than the AFS data. These results challenged the assumption made for annual estimates that all farms are captured using the AFS procedures made on the basis of the completeness of the frame, the high quality of the personal enumeration and their training on collecting the data. The more extensive census procedures using dual-frame estimation produced a larger farm count than the AFS estimation. Because the AFS estimate was the major indicator for producing annual farm number estimates, it was likely these farms were also underestimated in the non-census years.

Since 2007, farm number estimates reflect adjustments in the number of farms based on estimates produced by the censuses. NASS continues research to address the methodological issues discussed.

#### Statistical Bulletin Publication Schedule

Statistical Bulletins (SB): The National Agricultural Statistics Service will issue a series of nineteen bulletins containing final estimates for agricultural data series based on the review of the 2012 Census of Agriculture and other information. The product number, bulletin title, and tentative release dates are as follows.

SB1030	Farms and Land in Farms Final Estimates 2008-2012	05/28/14
SB1031	Agricultural Land Values Final Estimates 2009-2013	06/19/14
SB1032	Citrus Fruits Final Estimates 2008-2012	08/26/14
SB1033	Vegetables Final Estimates 2008-2012	08/26/14
SB1034	Cattle Final Estimates 2009-2013	09/04/14
SB1035	Hogs and Pigs Final Estimates 2008-2012	09/04/14
SB1036	Milk Cows and Production Final Estimates 2008-2012	09/04/14
SB1037	Sheep and Goats Final Estimates 2009-2013	09/04/14
SB1038	Chickens and Eggs Final Estimates 2008-2012	09/04/14
SB1039	Honey Final Estimates 2008-2012	09/04/14
SB1040	Meat Animals, PDI Final Estimates 2008-2012	10/29/14
SB1041	Milk Disposition and Income Final Estimates 2008-2012	10/29/14
SB1042	Poultry Production and Value Final Estimates 2008-2012	10/29/14
SB1043	Noncitrus Fruits and Nuts Final Estimates 2008-2012	10/30/14
SB1044	Field Crops Final Estimates 2008-2012	11/03/14
SB1045	Rice Stocks Final Estimates 2008-2013	11/03/14
SB1046	Stocks of Grains, Oilseeds, and Hay Final Estimates 2008-2013	11/03/14
SB1047	Potatoes and Sweet Potatoes Final Estimates 2008-2012	11/03/14
SB1048	Crop Values Final Estimates 2008-2012	11/03/14

Agricultural Census Publications: The U. S. Department of Agriculture's National Agricultural Statistics Service (NASS) released several products from the 2012 Census of Agriculture on May 2, 2014. The Census is the leading source of statistics about the Nation's agricultural production and the only source of consistent, comparable data at the county, State, and national levels. The Census includes all places from which \$1,000 or more of agricultural products, including government payments, were produced and sold, or normally would have been sold, during the census year. Census publications also include demographic items such as sex of operator, residence on or off the farm, days worked off farm, years present on farm, age group categories, race, and number of persons living in each household.

### **Information Contacts**

Listed below are the commodity statisticians in the Environmental, Economics, and Demographics Branch of the National Agricultural Statistics Service to contact for additional information. E-mail inquiries may be sent to nass@nass.usda.gov.

Troy Joshua, Chief, Environmental, Economics, and Demographics Branch	(202) 720-6146
Tony Dorn, Head, Economics Section  Rachel Antzak – Cash Receipts, Land Values  Daryl Brinkman – Prices Received, Prices Received Indexes  Tynesha Boomer – Agricultural Resource Management Survey (ARMS)  Kuan Chen – Prices, Prices Research  Chris Dickerson – Prices Received, Prices Received Indexes  Mark Gorsak – Prices, Prices Research  Judy McDermott – Prices Paid, Prices Paid Indexes  Michael Mathison – Agriculture Resource Management Survey (ARMS)  Joe Hagedorn – Cash Rents, Grazing Fees	
Scott Shimmin, Head, Environmental and Demographics Section  Liana Cuffman – Chemical Use, American Indians, Census  David Colwell – Census of Agricultural Industrial Reports  Doug Farmer – Census  Steve Peterson – Farms, Land in Farms, Census  Jackie Ross – Census  Theresa Varner – Farm Labor, Chemical Use	

#### **Access to NASS Reports**

For your convenience, you may access NASS reports and products the following ways:

- All reports are available electronically, at no cost, on the NASS web site: <a href="http://www.nass.usda.gov">http://www.nass.usda.gov</a>
- Both national and state specific reports are available via a free e-mail subscription. To set-up this free subscription, visit <a href="http://www.nass.usda.gov">http://www.nass.usda.gov</a> and in the "Follow NASS" box under "Receive reports by Email," click on "National" or "State" to select the reports you would like to receive.

For more information on NASS surveys and reports, call the NASS Agricultural Statistics Hotline at (800) 727-9540, 7:30 a.m. to 4:00 p.m. ET, or e-mail: nass@nass.usda.gov.

The U.S. Department of Agriculture (USDA) prohibits discrimination against its customers, employees, and applicants for employment on the bases of race, color, national origin, age, disability, sex, gender identity, religion, reprisal, and where applicable, political beliefs, marital status, familial or parental status, sexual orientation, or all or part of an individual's income is derived from any public assistance program, or protected genetic information in employment or in any program or activity conducted or funded by the Department. (Not all prohibited bases will apply to all programs and/or employment activities.)

If you wish to file a Civil Rights program complaint of discrimination, complete the <u>USDA Program Discrimination Complaint Form</u> (PDF), found online at <a href="http://www.ascr.usda.gov/complaint\_filing\_cust.html">http://www.ascr.usda.gov/complaint\_filing\_cust.html</a>, or at any USDA office, or call (866) 632-9992 to request the form. You may also write a letter containing all of the information requested in the form. Send your completed complaint form or letter to us by mail at U.S. Department of Agriculture, Director, Office of Adjudication, 1400 Independence Avenue, S.W., Washington, D.C. 20250-9410, by fax (202) 690-7442 or email at program.intake@usda.gov.
